

PHYTOSANITARY TEST FOR SAPO FOUNDATION AND MOTHER BLOCKS DURING 2020

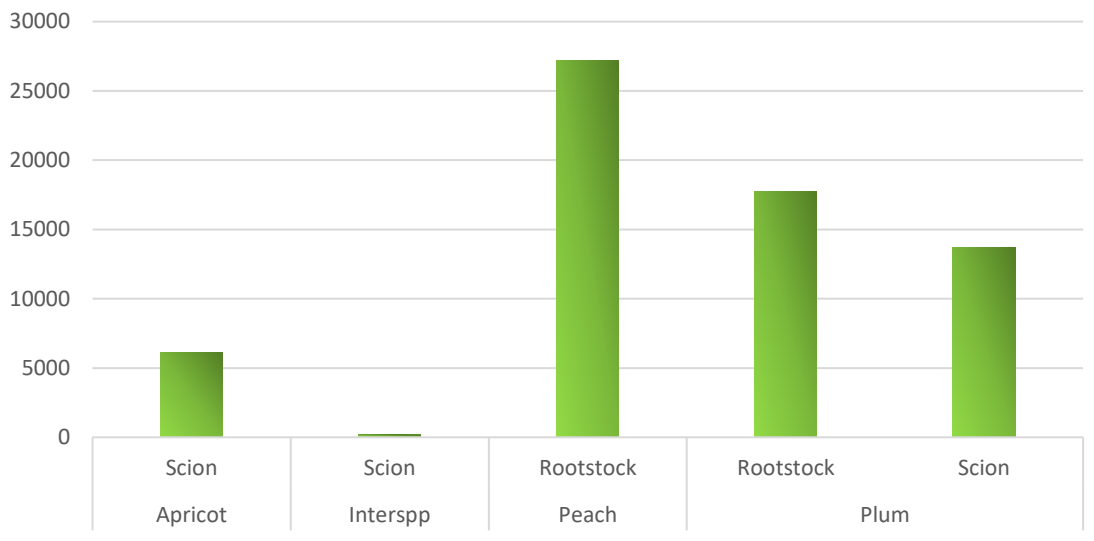

Foundation and mother blocks were tested for Prune dwarf virus (PDV), Prunus necrotic ringspot virus (PNRSV), Apple chlorotic leafspot virus (ACLSV), Apple mosaic virus (ApMV), Apple stem grooving virus (ASGV) and Grapevine Fanleaf virus (GFLV) as prescribed by the Plant Certification Scheme.

The number of tests per fruit group in foundation and mother blocks are represented in the chart below.

SAPO collected 1814 samples for plum marbling tests randomly from 280 blocks representing in total 58 500 foundation and mother blocks trees, which included scion and rootstock blocks. The number of trees and number of varieties included in these tests, are indicated in the charts below.

Number of Trees tested for Marbling during 2020

Number of Varieties tested for Marbling during 2020
